

01

Service levels

Operations edition | Revised February 2026

Support severity is based on customer impact, not customer sentiment. Choose the highest severity whose definition is fully satisfied.

PRIORITY 1 - CRITICAL

A production service is unavailable for most users or critical customer data is at immediate risk. Acknowledge within 15 minutes and update every 30 minutes.

PRIORITY 2 - HIGH

A major feature is unavailable with no reasonable workaround, but the service remains partially usable. Acknowledge within 1 hour and update every 4 hours.

PRIORITY 3 - STANDARD

General defects, how-to questions, and issues with an acceptable workaround are Priority 3. Acknowledge within 1 business day.

AFTER-HOURS COVERAGE

The on-call team handles Priority 1 incidents at all times. Priority 2 and Priority 3 tickets received after hours enter the next business-day queue.

02

Password resets

Operations edition | Revised February 2026

Password assistance must restore access without disclosing whether an unrelated email address belongs to a Northstar customer.

IDENTITY VERIFICATION

Verify the customer's account email and the last four characters of the workspace ID. Never request or accept the customer's current password.

RESET PROCEDURE

Open the customer profile, select Security, choose Send password reset email, and record the action in the support ticket.

LINK EXPIRATION

Password reset links expire after 30 minutes and can be used only once. If a link expires, send a new message from the customer profile.

LOCKOUT BEHAVIOR

Five failed sign-in attempts within 10 minutes lock the account for 15 minutes. Support may send a reset link during the lockout but must not manually bypass it.

03

Refund decisions

Operations edition | Revised February 2026

Refunds should be consistent, documented, and limited to charges covered by the customer agreement or an approved service-recovery exception.

STANDARD ELIGIBILITY

A first subscription payment may be refunded when requested within 30 calendar days of purchase. Renewal payments are reviewed case by case.

APPROVAL LIMIT

Support specialists may approve refunds up to \$250. Refunds above \$250 require approval from a Support Manager before they are submitted.

NON-REFUNDABLE CHARGES

Completed professional services, custom data migrations, and consumed usage credits are non-refundable unless the charge resulted from a verified Northstar billing error.

PROCESSING TIME

Approved card refunds are submitted within 1 business day and normally appear on the customer's statement within 5 to 7 business days.

04

Escalation and closure

Operations edition | Revised February 2026

A complete escalation lets the receiving team act immediately without asking the customer to repeat information already provided.

ENGINEERING ESCALATION

Escalate when a reproducible defect affects multiple customers, causes data loss, or has no documented workaround. Include timestamps, request IDs, and reproduction steps.

SECURITY ESCALATION

Suspected account takeover, exposed credentials, or unauthorized data access must be sent to the Security on-call team within 10 minutes. Do not investigate beyond approved support tools.

CUSTOMER HANDOFF

Tell the customer which team owns the next action and when the next update will arrive. Ownership stays with Support until the receiving team accepts the escalation.

TICKET CLOSURE

Close a ticket after the customer confirms resolution or after 3 follow-up attempts across 5 business days. The final note must summarize the issue, action, and outcome.
